## Letters to the Editor

Aug. 19 1935.

**Dear Editor:**  
In reply to the letter signed "A Social Credit Supporter" I may say that I regret the error re the processing tax on wheat. To be absolutely fair and generous I had set it at \$250,000 but must have omitted a zero in copying my letter. However the fact remains that this amount is a mere nothing compared to the millions that are required.

I have not overlooked the fact that they employ machines in the larger banks today but still maintain that thousands of clerks, officials, inspectors etc. will be required to prevent what Mr. Aberhart terms smuggling. In a most emphatic way he states that no goods shall be smuggled into Alberta so \$25 suits if he sets the just price at \$40. How many roads cross our eastern border? Then when all parcels in His Majesty's Mail have been inspected, rejected or raised in price, you require a fair return of civil servants?

However it's still a matter of theory as no practical plan has been offered yet. I am sure I cannot agree when you say "experts will be hired to put it into operation". A man is an expert only after real experience and where have they had a chance to gain that experience in the operation of a Social Credit government?

Far be it from me to oppose any system that will really bring help to our people in need. However the plan being offered is but a mere exper-

**S**triking while the iron is hot is a characteristic of the West and has gained the admiration of the tourists who come here. So there is little surprise in the announcement that the Board of Trade and the Canadian Pacific Railway have leased the bungalow camp at beautiful Lake Windermere for the summer. It is anticipated that there will be an increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient and America.

The camp, which is being taken over by small but energetic men, is one of the most delightfully situated in the Canadian Rockies. Built originally for the Canadian Pacific Railway, the camp has been successfully operated for the past

several years as a private camp for girls. In the centre of an ideal vacation district, it is easily reached by road and mountain ways.

The famous Bow River derriere road leads to it, a good route which could be followed through the mountains from Cranbrook.

The lake averages about 68 acres in the summer and is 100 feet deep. The lake is the celebrated Lake of the Hanging Glacier, with six species of fish. It is 10 miles long, one moraine with an ice wall several hundred feet high, which has been broken through by small leapers into the lake.

ment, dictatorial in form, constituted solely by Wm. Aberhart, B.A.

N. Myrtle Ward

## Have You Met?

W. F. Pearce  
Fusser of the Kingship of Britain

Mr. Pearce is one of the best-known pursers in trans-Atlantic travel. He has been in the service with the Canadian Pacific has made friends with thousands of regular travellers. He has been in the service in the Empress of Scotland, and has been round the world so often that he looks like a sailor. Hong-Kong are as familiar to him as the rose-filled gardens of his Southampton home.

## THRESHERS' LICENSES Important Notice

All operators of Threshing Rigs and Combines in Alberta are required to be licensed, the fee being \$1.00. Those operating without a license are liable to prosecution.

Licenses may be secured through the rural Municipal Secretaries, the District Agriculturist, or by sending direct to

Alberta Department of Agriculture  
Edmonton, Alberta

## Arrowwood Loses Popular Citizens

## Max Moss Narrowly Escapes Death

The town of Arrowwood and the surrounding district will experience a deep loss with the transfer of R. E. Hales, local Federal Grain buyer to the company's branch at Bufton, 20 miles west of Leduc and forty miles south-west of Edmonton.

Mr. and Mrs. Hales came to Arrowwood nine years ago, from which time to the present, both have been active workers in community enterprises, endeavouring at all times through their efforts to make the community a better one. A glance at the work achieved by each of these popular citizens will unquestionably lead the people of this locality to a realization of the great loss which will be felt due to the departure of Mr. and Mrs. Hales.

Mr. Hales, who has been an active member of the U.F.W.A. and the W.A. of the United Church will be greatly missed. For the past year, she has most successfully carried on the work of the Brownies, acting in the capacity of Brown Owl.

Besides being a successful grain buyer at this point Bob was always an enthusiastic worker in athletic and sporting circles. As a baseball player he has been a member of the Arrowwood team every year while here and during that period became popular with fellow players and spectators. In key too Bob will be missed. As manager of the Midget Hockey Club last year, the boys had a successful season both on the ice and financially. Interest in the youth welfare was manifested in the work done by Mr. Hales as Cub-Master for the local division.

In dramatic circles as well, the loss will be keenly felt as Bob was ever ready to lend his assistance either on the stage or as managing-director.

Bob has expressed his desire to enjoy a change from prairie life and feels that this will be a welcome change. Friends and acquaintances all join in wishing Mr. and Mrs. Hales the very brightest future in their new location.

## ALBERTA SAVINGS CERTIFICATES

### A Sound Form of Investment

By Issuance of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their saving at attractive interest rates, at the same time assisting the Province in maintaining public services vital to the welfare of the people.

In addition to the usual "Demand" Certificates, available in denominations of \$5 and upwards, the Government in 1933 inaugurated Term Certificates, bearing a fixed rate of interest for stated periods of one, two or three years. Purchasers of these certificates are afforded the same security as on Provincial Bonds. The term certificates are available in various denominations from \$25 up and are not subject to the varying market prices for debentures.

4½%  
Per Annum Paid on  
Two and Three Year  
Term Certificates.

3½% Paid on One-Year  
Term Certificates.  
3% Paid on Certificates  
redeemable on demand.

## Agriculture In School

An almost perennial subject of discussion is the school curriculum, what it should and what it should not contain. Many there are who contend that the present-day curriculum in most countries is over-loaded with subjects and contain much that should not be there. There are others, including agricultural organizations, who are constantly pushing for new subjects to be added. For example, there are those who strongly advocate the teaching of temperance, not so much in the wider meaning of that term, but in direct relation to the use of intoxicants. Others insist that religion should be taught, while others again object even to recitation of the Lord's Prayer or the Ten Commandments. Still others call for the teaching of agriculture, the breeding and raising of animals, the number of so-called social subjects and persons from different groups insist should be included in the curriculum are almost beyond calculation.

The real difficulty seems to lie in the opposing views held as to what is education, and what is the function of the school in providing it to the youth of the land. Is the main function of the school to impart information, or is it to do so develop and train the mind and intellectual power of the student? Is it to expand his horizons, or is it to limit his prospective of the world in which they may live or the particular activity in which he may be engaged? If the former, then a very extensive curriculum would be necessary to cater to all classes of students; if the latter, a fairly short and condensed curriculum might be sufficient.

There is one subject, however, apart from the necessary subjects such as arithmetic, grammar, geography, history, composition, etc., which it has been generally recognized should, to the full extent possible, be included in our school courses, and especially so in the western provinces of Canada, and that is, agriculture. Addressing the recent annual convention of the Canadian Society of Technical Agriculturists assembled at Edmonton, Dr. R. C. Wallace, president of the University of Alberta, discussed this subject at length, and in the course of his address he stated that a good deal of thought had been given during past years to the question of how agriculture could best be introduced into the school curriculum. Dr. Wallace said that it had to be frankly admitted that relatively little success had attended the efforts of those who are concerned with school education in the teaching of agriculture; that the formal agriculture of Grade 8 and X of their high school had not wholly achieved what was expected of it, and the schools had not wholly appreciated what was learned in the school room.

While stating that it would necessitate going too far afield to discuss all the underlying difficulties—lack of trained teachers, discontinuity of school life during the growing season, etc.—Dr. Wallace said it had been learned that in primary and high schools science and not the art of a vocational teacher should be taught. For this reason, he said, the general opinion that successful work in agriculture in the public and high schools will come incidentally to the study of natural science. If the applications of the principles of science were continuously made in plant and animal processes, in weather, life, and in soil processes, interest in agriculture and in agricultural procedure would grow naturally out of the underlying scientific principles which have universal application; and the teacher would not be placed in the embarrassing position of posing, unwillingly, as an expert in a field where he or she was not accepted. That would be, he felt, the emphasis of the future.

On the other hand, Dr. Wallace pointed out, there had been real success in boys' and girl's club work, and in school fairs in which agricultural projects had played their part, mainly because the activities were extra-curricular, and the real interest of the farm with the help of the school and of trained district agricultural agents. In fact so far as the work carried out by the young people themselves, they were the soundest accomplishment which had yet been achieved in the vocational activity in agriculture of school-age boys and girls. The unfortunate fact was that this system, as yet, did not reach all schools and school children in the rural districts.

These observations by Dr. Wallace would seem to merit the serious consideration, not alone of Provincial departments of education and agriculture, but of the parents of farm boys and girls who are themselves the trustees of rural schools and directors of agricultural societies. Dr. Wallace also suggested that the practical truths which are fundamental, which must be recognized and obeyed if success is to be attained. These can be learned in school through the natural science course, but the practical course may not be distinctly labelled agriculture. Successful agriculture cannot be learned wholly from a book or through a study course, any more than carpentry or any other vocational. But if pupils are sent out from the schools well grounded in fundamentals, made acquainted with the important truths of the science, trained to observation, to detection of the true from the false, imbued with a spirit of inquiry, they will be primarily equipped for a career in agriculture or in any profession they may choose.

### Flying Fish

Flying fish do not fly, they do not "wing", but they can fly through the air. After casting up speed in the water, the fish take to the air, and wind current and momentum do the rest. Considerable speed is attained and a distance of 500 feet is often covered by these car.

### Heard It Anyway

Although he sat only a few hundred feet from the bandstand, a visitor to a local fair heard the musicians from a distance of more than 500 miles. Unable to hear the band concert from where he was sitting, the man turned on his car radio and picked up the program from Chicago.

## Likes Life In The Arctic

### Quebec Girl Spends Two Years In The North, And Is Going Back Again

Citres have no attraction for Marie Onset, 20-year-old Gaspe girl. She left her city life "with a bang" when she visited Montreal, after two years at Cameron Bay, a mining settlement on Great Bear Lake, near the Arctic circle.

Marie spent three years in the Arctic, at a small, isolated, unmetalled town for her home in Gaspe. Late in the summer she expects to marry a young mining engineer, a graduate of Queen's, now in the Athabasca district, and return to the north to live.

In the winter of 1932-33, she left a fresh snow-covered sheltered site of a convent, set out from Gaspe for Cameron Bay to visit her brother whom she had not seen for eight years. Travelling by rail to Peace River she joined a party taking in traps. They followed a long, cold journey by boat through the Peace River, Lake Athabasca, Slave River, Great Slave lake and the Mackenzie and Great Bear rivers.

When the party reached Fort Franklin, 250 miles from their destination, Sept. 21, the water was freezing fast, and there was no hope of navigating Great Bear Lake that season. A plane was chartered to complete the trip, and Marie had her first experience of flying.

By air she visited silver and pitchblende mines in the vicinity where she had been before, she was among her later experiences. It was some time, however, before she was permitted to go down into the mines. The miners were superstitious.

At Cameron Bay, where Marie was one of eight white women, she had plenty of time to observe the life and customs of the Indians and Eskimos. She found the Indians, she said, had been cleaner in their habits than the Indians.

Wives among the Eskimos may be barbers just as are articles of commerce. Marie told of one occasion when an Eskimo had been forced to perch on a five rifle which he coveted. Stealing another man's wife, however, is a serious crime, for which, in the Eskimo idea of justice, death is the fit punishment.

### Gull Fond Of Cherries

#### Have Their Own Method Of Securing

The Fruit

A remarkable case of birds meeting a new situation by a change in their feeding methods has been reported to the U.S. Biological Survey. The birds are the gulls at Salt Lake Valley of Utah. They are fond of cherries. Great cherry orchards have sprung up through the valley in the last few decades.

Now the gulls, who are clumsy, web-footed, cannot perch on the branches and help itself to cherries like the robin. It must wait for the fruit to fall which doesn't happen in the great commercial orchards. So the gulls have learned to catch the cherries, beat down the fruit with their wings and then fly to the ground and feast on their harvest. They also have been observed in the tops of the cherry orchards, pecking the fruit and eating them down, devouring all the fruit within reach.

The new food habit says Clarence Colton, food-habits expert of the Biological Survey, seems to have developed as a result of a locally increased gull population and the consequent greater competition for the limited supply of usual foods.

### Cheered Wrong Man

Lloyd George has a "double" in James Gray, a magistrate in Glasgow, Scotland, who was the first to be appointed before an audience of 3,000 in Glasgow to tell about his New Deal proposals. Gray arrived the half hour was mistaken for Lloyd George, and was round and round of cheer when Lloyd George arrived much of the lung power had been spent.

### The Lunar Eclipse

A lunar eclipse is caused by the direct alignment of the sun, earth and moon, with the moon passing through the umbra cone, stretching about 360,000 miles into space. The long duration of the late eclipse—1 hour 40 minutes and 18 seconds—was due to the motion of the earth through a thick portion of the cone approximately 220,000 miles away from the earth.

### NATURE'S MINERAL SALTS

## South Africa Celebrates

### New British Dominion Was Formed 25 Years Ago

In the hectic period of the King's silver jubilee another has been overlooked, that of the Union of South Africa. It was in the summer of 1910 that the former Boer republics of Transvaal and the Orange Free State joined with "The Cape" and Natal to form another British dominion overseas.

The Boer War had ended some nine years previously, and thanks to the vision, the generous trust of Sir Alfred Milner, then prime minister, and the Dutch people were granted a free constitution within the British Empire instead of being treated as a conquered nation. Instead of their independence being taken away, then they were given greater freedom than they ever had under old "Oom" Paul Kruger.

There were, probably, still among the older Afrikanders, a few recalcitrants, but the great majority of the 2 million Afrikanders, South Africa's first and British-born—such is the situation in Canada—Canadians first, then loyal Britons. Their loyalty was put to a severe test four years after Union when the Great War broke out and many Afrikanders, who had attempted to foment an anti-British rising, a small number did make themselves troublesome, but Boer and Britain combined to crush the German forces and soon put an end to Germany's hold in South Africa.

There is no greater Briton in the Empire than the former Boer general, Jan Smuts, who has one of the finest minds in the world, and General Hertzog, the prime minister, has been a close friend of Britain. South Africa has a white population of about two million, 55 per cent. Dutch and 40 per cent. British. The country is very prosperous, chiefly owing to its vast gold belt, and it can look forward to the future with confidence.—St. Thomas Times-Journal.

### Has Lived On Farm

#### Canada's Second Woman Senator Eight Years In Saskatchewan

Canada's new woman senator from Saskatchewan, from first day on a Saskatchewan farm. She is Mrs. Howard Falls, and she was recently appointed to the senate.

Mrs. Falls, in these days gone by, once owned for eight years on a farm in Saskatchewan, according to word from the east.

An eloquent and public spirited woman of Peterborough, Ontario, farmer, Mrs. Falls holds the distinction of being the second woman member of the Canadian Senate. She is the third woman to hold a seat in Canada's parliament, and the only woman on the government side of the red chamber.

The name of Mrs. Eva Campbell Falls appeared among the names of 100 women nominated by Anna Marnier Bennett. She combines the ability of performing most of the heavy duties of farm life with that of an eloquent platform speaker.

In February, 1930, shortly after the election of the new members of the provincial council had decided in Canada that women were "persons" and entitled to all the privileges enjoyed by men in respect to government, the then prime minister, W. L. Mackenzie King, appointed Mrs. Falls to the Senate. She was the first woman senator, and the second woman to become a member of Canada's parliament.

Long before that, in 1921, Miss Agnes MacPhail, a Grey Highlands woman, was elected to the House of Commons for Southeast Grey, Ont. She was the first of her sex to take a seat in the Dominion parliament and has been returned at every general election since.

### Damage Has Been Repaired

#### Last Evidence Of Zeppelins' Havoc Disappears From London

At last visible evidence of the havoc wrought by London's airships during World War I disappears with disappearance of the waste block near Ely-place, in Camberwell, where three houses were blown to pieces in a 1917 air raid, has been cleared for a row of modern buildings. It was supposed to have been laid in the rubble of the destroyed houses.

The long duration of the late eclipse—1 hour 40 minutes and 18 seconds—was due to the motion of the earth through a thick portion of the cone approximately 220,000 miles away from the earth.

### Looking For Gold

Hendrik Verwoerd, Dutch-American historian and traveler, who recently communicated a radio program from New York, as a boy of 11 in Rotterdam spent three days watching a statue of Erasmus to see if the bronze figure really did turn a page of his book every hour, as the legend said.

Suitor—And where is your sister, Jimmy?

Jimmy—She just ran upstairs to change rings when she saw you coming.

The house where Verwoerd and his wife live is the same as the one in which the statue stands.

## FASHION FANCIES

### SUCH CHILDISH CHIC — EASY TO WEAR — SO SIMPLE TO MAKE AND AN MODER-COST

By Edna Worth

Here's a darling little coat, so cosy and enchanting for tiny tots, as they were—and smart.

The coat is buttoned snugly at the neck, and being double breasted, affords ample chest protection.

It was this model with hat to match, which was created with a wool silk crepe.

For more severe weather, a lovely idea is to use a quilted effect wooly jacket. This is warm and comfortable, and is easily taken away with the necessity of using an interlining.

Style No. 303 is designed for sizes 2 to 6 years. The coat is made of 1 1/4 yards of 54-inch material for hat and coat with 1 1/4 yards of 35-inch material for interlining. Pattern includes hat and coat.

Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Avenue.

Summer Fashion Book contains many more smart, cool vacation wear patterns, all at copy-to-day, the price is 15 cents.

Figures of the production of processed cheese in Canada were collected by the Dominion Bureau of Statistics for the first time in 1924. Total production in that year amounted to 16,983,283 pounds. Since 1925, when 32,652,569 pounds were produced, production has increased to 10,636,042 pounds in 1933. Production in 1934 amounted to 11,996,348 pounds, an increase over 1933 of 1,361,324 pounds, or 13 percent.

The highest production of processed cheese in Canada was recorded in 1929, when 35,365,000 pounds were produced.

The cheese is made in the Atlantic, namely, Dakar and Pernambuco.

The landmarks at Williams Lake, B.C., lie in the centre of a miniature country to the east and the Chilcotin country to the west. An idea of the size of this territory can be gauged from the fact that it takes three weeks to drive across it.

The country is sparsely populated, the remoter ranches, while the bulk of the cattle which comes from the west of the Chilcotin region, requires ten days to take the trip.

**Arrowwood Notes**

Miss Marjorie Leonard was home last week-end visiting with her relatives and friends.

A construction crew are making repairs to the Federal grain elevator. The elevator had settled, so a new foundation will be set under the elevator.

Melvin Bowman has accepted a position with the Federal Grain and will be the buyer for that company in Arrowwood.

Fred Miller and Steve Williams distinguished themselves as members of the Old Timers Baseball team at Gleichen last Friday when their younger All Stars rivals were defeated by a 6 score.

Irwin Scott left Tuesday for his home at Vulcan. He intends to assist with harvesting there.

Malcolm Taylor returned from the University Summer School last Friday.

Miss Millie Taylor will depart Thursday night for a two week vacation with her mother at Vancouver, B.C.

The Richards family visited with Rev. and Mrs. V. M. Gilbert and family of Strathmore last week-end.

Mr. P. H. Coleman spent two days last week in the busy town of Milverton.

Allan Phillips has greatly improved the appearance of the front of his store by displaying "Fritons," the wonder-horse of the wild-west.

Born—At Mrs. Lewendon's Nursing Home, on Tuesday Aug. 20 to Mr. and Mrs. Godkin of Milo, a daughter.

Watch for posters advertising an auction sale at the residence of R. C. Moreash on Sat., Sept. 7th. Furniture, household utensils, and numerous other articles will be auctioned.

Born—At Mrs. Lewendon's Nursing Home on Sunday Aug. 18, to Mr. and Mrs. N. Neergaard of Carseland, a son.

**REWARD WHEAT**

Last year our Reward wheat was degraded from No. 1 to No. 2. I have down to lower grades for the reason that it contained a large percentage of green or grey color. This discolouration, it has been found, was caused by the Reward wheat being cut on the green side. Apparently Marquis and Garnet can be cut when slightly green. Reward, however, cannot. Farmers are recommended, therefore, to consider allowing their fields of Reward to ripen thoroughly before being cut.

**Here and There**

Pine percheron stallions, smartly groomed cavalry chargers of the mounted police, prancing thoroughbred horses and mounts trained in jumping and for the hunt—these were the attractions at the annual horse show at the Canadian Mounted Police stables, Montebello, P.Q., on the north shore of the Ottawa, for the annual meeting of the Canadian Mounted Police here this summer during August 16-18, Thursday to Sunday. A musical entertainment was given each evening. The event is under the patronage of His Excellency the Governor General and Canadian and American society folks are expected in large numbers.

England's short stay at the British Spring Hotel has been to take in the sights. His Excellency T. MacKenzie, Ambassador to Great Britain, stated to an interviewer, "I prefer just to enjoy myself and do not like to be interviewed until there are more arduous duties later on."

Attending a gathering of the Rotary Club of Victoria at the Empress Hotel recently, President Joseph A. Lyons of Australia, pointed to the British Commonwealth as a great force for peace and stability. "We must cultivate a more favorable attitude with regard to commerce," he said. Australia bought from Canada \$12,000,000 worth of goods while Canada bought from Australia only \$4,000,000 worth.

The Algonquin Hotel, St. Andrews, B.C., opened for the summer season at the end of June, and is now the most popular hotel in the city. Their Excellencies the Governor-General and Lady Bessborough, the Duke and Duchess of Gloucester and the famous Kary's Cove bathing beach is again as in former years a very popular resort for the children and the younger set.

*Prices cut to the quick*

To-days most popular combine, the Oliver, Nichols and Shepard Combine, the combine with the regular large thresher cylinder, the "Man Behind the Gun" and steel winged beaters.

The demand for these combines proves their worth, and the price—why its astounding what these machines may be bought for. An inquiry will bring you all the details.

These combines may be had in 12 and 16 foot sizes with table extensions, and all have the recleaning equipment built into them.

We also have a few second hand binders.

The foreman reported that the jury was unable to reach a verdict. The judge reproved them, saying that the case was a very close one and remanded them to the jury room for further deliberation.

"And if you don't reach an agreement before evening," the judge added, "I will have twelve suppers brought in to you."

"May it please your honor," the foreman replied, "You had better make it eleven suppers and one base of hay."
